

MB 18-184 Letter Of Support

My name is Randy Williams, and I am the operator of WGSX 104.3 FM in Lynn Haven, Florida.

I fully support the FM Class C4/73.215 petition filed by MMTC and SSR Communications, Inc. and urge the Commission to adopt the complete proposal.

Along the Florida Gulf Coast we frequently have to deal with dangerous weather situations and expanding our coverage area by increasing our output power to 12kw would help tremendously in alerting more people to severe weather related issues, as we provide a lot of important local information to our community. We recently experienced a hurricane (Irma) and tropical storm Elberta and we delivered 24 hour coverage during these two serious storms. We are very involved in the area and give lots of hours over the air and manual labor to groups, high schools and local non-profit organizations that provide for the needy.

I ask that you consider full implementation of the MB 18-184 proceeding without delay.

Sincerely,

Randy Williams
